DETAILED ACTION

Applicant's previous amendment of applicant's specification and sequence listing, in the paper of 1/7/2008, is acknowledged. Claims 15 and 21-28 are still at issue and are present for examination.

Upon further examination, the below objection to applicants specification is found to be in order.

Specification

The disclosure is objected to because of the following informalities:

In reviewing applicants submitted sequence listing of 1/7/2008, it has come to the attention of the office that submitted SEQ ID NO:3, which is referenced in allowable claim 15, is a 832 amino acid protein. This is the same length as the SEQ ID NO: 3 in the sequence listing submitted on 8/27/2008, and 10/10/2006, however, the SEQ ID NO:3 submitted with the earlier sequence listings of 6/12/2002 and 5/17/2002 are only 830 amino acids long. This discrepancy between applicants submitted sequences for SEQ ID NO:3 as originally filed and the sequence of SEQ ID NO:3 as it now exists is objected to as new matter.

Clarification is requested.

Allowable Subject Matter

Claims 15 and 23-26 are allowable over the prior art.
